### The steps taken to prevent and reduce the risk of forced or child labour in the supply chain

A.P.T. imports good from 4 countries

Taiwan

China

U.S.A.

GERMANY

We take the following steps to reduce the risk of forced labour and or child labour

- 1- We only import parts from established reputable companies overseas.
- 2- We have visited and inspected over 95% of the supplier's manufacturing facilities, and 100% of the facilities outside of China.
- 3- The only high-risk country that we do business with is China. China only makes up 5% of our import volume, as most parts are coming from Taiwan. We never import any parts from Xinjiang province where most Uyghur people are located.
- 4- All employees involved in purchasing are aware of the risk of Child and forced labour and will take steps to reduce that risk before we add any new suppliers.
