Re: Toro Aluminum's response regarding the Fighting Against Forced Labour and Child Labour in Supply Chains Act

Toro Aluminum is a manufacture of Aluminum window wall material used in the construction of high rise buildings. Our supply chain consists of aluminum extrusions purchased from major Canadian extruders, glass purchased from major glass float plants in North America and other hardware and components purchased from major North American suppliers. Our entire supply chain contains very little risk of force labour or child labour as we have made the conscious decision to keep our supply chain on-shore to avoid this risk.
