A. ABOUT THIS REPORT

Wayfinder Corp. ("Wayfinder", "we", "our" or the "Corporation") has prepared this report (the "Report") being submitted pursuant to section 11 of the Fighting Against Forced Labour and Child Labour in Supply Chains Act (the "Act"), for the financial year ended December 31, 2023 (the "Reporting Period"). The Act came into force on January 1, 2024, and imposes disclosure requirements on prescribed reporting entities ("Reporting Entity").

As a Reporting Entity, we have prepared this Report that describes the efforts being taken to enhance the transparency in our supply chains by outlining the steps taken during the Reporting Period to prevent and reduce the risk that forced labour or child labour is used at any step of the production of goods in Canada or elsewhere, or of goods imported into Canada. This has been done in accordance with the mandatory reporting criteria outlined in Sections 11(1) and 11(3) of the Act.

Wayfinder does not report under similar legislation in any other jurisdiction.

B. INTRODUCTION

Wayfinder recognizes that the mining industry plays an important role in preventing and assessing the risk of forced labour and child labour in Canada's supply chains. We acknowledge there may be risks of forced Labour and child Labour in the sector and are committed to continuous improvement of our due diligence, risk assessment, remediation, and training processes.

Accordingly, at Wayfinder we are committed to maintaining a workplace and culture of respect, dignity, and safety and expect our suppliers and contractors to comply with Wayfinder's prohibition on the use of all forms of forced labour, child labour, all modern forms of slavery, and any form of human trafficking.

C. WAYFINDER'S BUSINESS STRUCTURE, ACTIVITIES & SUPPLY CHAIN

Structure

Wayfinder is a privately owned corporation, headquartered in Alberta, Canada. We operate in the mining, quarrying and oil and gas extraction sector in accordance with the sector classification from the Canadian Government.

Our locations for operations are all in Canada within the province of Alberta. For more information, please refer to [Locations — Wayfinder \(wayfindercorp.com\)](https://www.wayfindercorp.com/locations)

Activities

The Company's primary business is mining and processing of in-basin domestic proppant along with proppant transloading services for the primary use of oil and gas well completions in Western Canada. Wayfinder mines, processes, and transloads proppants in Canada by employees in accordance with the provincial employee and safety standards acts for the province of Alberta.

Supply Chain

Wayfinder prioritizes partnerships with suppliers who align with our core values. This assists us in upholding our commitment to environmental stewardship, community engagement, and ethical business practices.

We procure both goods and services primarily with Canadian vendors, including but not limited to information technology, telecommunications, parts, transportation, equipment, storage, mail and courier services, payroll, marketing and promotional goods, consulting services, additives, safety and protective gear, and office supplies.

D. POLICIES AND DUE DILLIGENCE PROCESSES

Governance

Wayfinder's Board is accountable for our strategic objectives, including sustainability matters, as well as overseeing the effectiveness of the Wayfinder's risks and internal controls. There are processes to keep the Board informed of the interrelationship between the business environment and its associated risks. These reporting processes are intended to facilitate and stimulate discussion of our key business risks and progress in addressing and monitoring those risks.

Wayfinder, with its parent company Sanjel Energy Services, has created a Modern Slavery Act Committee (the "**Committee**") that consists of varied representation, to develop a multi-year program to raise awareness and steps to prevent and reduce the risk of forced and child labour in our operations and supply chains. Part of the Committee's mandate is to keep the Board and Executives informed of the status, findings, potential risks, and any legislative developments.

Policies

In accordance with our Code of Conduct and Whistleblower Policy, employees are encouraged to report any non-compliance situations or suspected violations to their Supervisor, Chief Officer, or Privacy Officer.

Due Diligence

For the reporting period of this report, Wayfinder does not have a specific formal documented due diligence process solely in relation to forced labour and child labour.

Wayfinder's leadership team manages our commercial relationships with all suppliers that are issued contracts in accordance with Wayfinder's best practices and procedures. The practices and processes applied by the Corporation's leadership team serve to develop relationships with suppliers who share in our commitment to doing business in line with our core values, safety, service, excellence, integrity, and

teamwork. We prioritize partnerships with suppliers who align with our core values and maintain an in good standing certificate of insurance, with coverages applicable to the material/services being provided to Wayfinder, along with an appropriate remittance address, Workers' compensation, yearly surveys, and GST number.

We intend to continue to engage with our stakeholders and our vendors to prevent and reduce the risk of child and forced labour within our business or supply chains.

E. POTENTIAL RISKS OF FORCED AND CHILD LABOUR RISKS IN OUR SUPPLY CHAINS AND OPERATIONS

In 2023, Wayfinder took the following steps to prevent and reduce the risk of child and forced labour being present in its supply chains:

- Formed a Modern Slavery Act Committee.
- Engaged an external partner to provide guidance to specific employees relating to the Act, including an education session directed at educating our employees on the Act and how to prepare to produce this Report.

Operations

Wayfinder views its risk of forced and child labour in its operations to be low as our operations and employees are only in Canada. Out of 160 countries, Canada is ranked 17th lowest in terms of prevalence of modern slavery by the Global Slavery Index produced by Walk Free, an international human rights group focused on the eradication of modern slavery.

In addition to a low jurisdictional risk, at Wayfinder we maintain employment practices consistent with Canadian labour and employment laws, which helps prevent and reduce the risk of child and forced labour in its operations.

Supply Chains

Wayfinder is not aware of any child or forced labour in its supply chains. However, we recognize that child and forced labour can occur in every industry, sector, and geographic location. At present, Wayfinder has started the process of identifying potential risks in its supply chains and operations. However, these steps have not yet been finalized.

Achieving complete visibility across all vendor supply chains is challenging and we understand that as part of a global supply chain, there may be risks that have not yet been identified. As our compliance program related to child and forced labour matures, we intend to consider further mitigation measures, as required.

We have not identified or been made aware of any instances of child or forced labour in its supply chains or operations. Accordingly, we did not take any remediation steps, including those related to the loss of income by the most vulnerable families as a result of remediation efforts.

F. TRAINING

We strive to have our people trained on our business standards and culture. In particular, our people receive training on our Code of Conduct policy where they are reminded and encouraged to identify potential violations in these areas, and to report behavior that does not comply with internal policies and procedures and external regulations and laws.

While Wayfinder has not implemented a routine aspect of its training program that addresses child and forced labour, as discussed above, in 2023 we provided the Committee with training on the Act, its requirements and the purpose of this Report.

G. MEASURING OUR EFFECTIVENESS

At present Wayfinder does not have methods of measuring the effectiveness of its processes that help prevent and reduce the risk of child and forced labour in our operations and supply chains. However, as we continue to evaluate our compliance measures in place that are designed to prevent and reduce the risk of child and forced labour, we intend to consider, where appropriate, implementing measures to assess the effectiveness of any of our processes.

H. APPROVAL & ASSERTATION

In accordance with the requirements of the Act, and in particular section 11 thereof, I attest that I have reviewed the information contained in the report for Sanjel Energy Services Inc. listed above. Based on my knowledge, and having exercised reasonable diligence, I attest that the information in the report is true, accurate and complete in all material respects for the purposes of the Act, for the reporting year listed above. I have the authority to bind ‘Wayfinder Corp’.

Signed on: May 21, 2024

Murray Bickley
Chairman and CEO
